

Livable Delaware Factsheet Locations on UD Lawn and Garden Website

Plants for a Livable Delaware Series – This series of brochures were developed to educate Delawareans about the problem of invasive plants in the landscape. Plants on the Delaware Invasive Species List that are still bought and sold in the nursery and landscape industry are highlighted in “Plants for a Livable Delaware” and at least 10 alternative plants are suggested to replace the popular invasive plant found in many home landscapes. Control recommendations for removing troublesome invasive plants are covered in “Controlling Backyard Invaders.” In “Livable Plants for the Home Landscape,” plant combinations are suggested that fill specific landscape niches, such as forest edges, sunny slopes and small garden spaces. Finally, “Livable Ecosystems: A Model for Suburbia” shows how to plant and manage rain gardens, meadows, forests and other landscape plantings that provide valuable ecosystem services Livable Lawns explains proper lawn management.
